### Professional Summary

- 7+ years of experience building modern, performant web applications with strong UX/UI sensibilities.
- Collaborated with cross-functional engineering/development teams using modern Agile Methodologies.
- Used Spec-driven development (SDD) using modern AI tools like Claude Code (Anthropic), Github Copilot (Spec Kit), Kiro (AWS) in designing, prototyping, and implementing value-centric solutions.
- Migrated legacy codebases and designed scalable component systems.
- Maintained and enhanced legacy ASP.NET MVC systems using C#.
- Built and deployed serverless applications with Netlify Edge Functions, Vercel, and Cloudflare Workers.
- Worked with serverless databases like Supabase (Postgres) and Cloudflare D1 (SQLite).
- Delivered accessible and responsive interfaces for international clients.

### Core Skills

- **Frontend:** Vue.js, Angular, TypeScript, Web Components
- **UI/UX:** Design Systems, Responsive Design, Accessibility, Figma
- **Backend (Support):** Node.js, Express, GraphQL, REST APIs
- **General:** JavaScript, HTML/CSS/SCSS, Git, Agile/Scrum
- **Serverless & Cloud:** Netlify Edge Functions, Vercel, Cloudflare Workers, Supabase, Cloudflare D1

### Professional Experience

#### Full-stack Software Engineer - Miller Development AB

Hybrid, Dumaguete, Central Visayas, Philippines

May 2019 – Present

- Developed and maintained core modules using Angular and Node for a real-time analytics dashboard.
- Integrated GraphQL APIs and developed backend features with Node.js and Express.
- Contributed in product discussions, architecture reviews, and agile sprints.
- Mentored junior developers and supported code reviews for quality assurance.
- Developed and maintained a SaaS platform focused on pay transparency and equity (Project: Sysarb).
- Implemented new UI features using Vue 3 and TypeScript with a scalable component architecture.
- Collaborated with remote product teams and stakeholders to align UI/UX with user needs.
- Drove performance optimizations and design consistency through internal audits.

#### **Frontend Developer - BetterTradeOff Ltd.**

Remote, Singapore

Jan 2024 – Present

- Built reusable and framework-agnostic Web Components to improve code reusability across apps.
- Led partial migration of legacy AngularJS to modular TypeScript components.
- Contributed to a scalable internal design system tailored for dynamic financial dashboards.
- Worked closely with designers and QA for seamless cross-team delivery.

#### **Education**

Bachelor of Science in Information Technology

Silliman University – 2018

Thesis: Developed a digital restaurant ordering system to improve order accuracy and speed for local food businesses.

#### **Languages**

- English (Fluent)
- Filipino / Cebuano (Native)

#### **Hobbies**

- Reading | Running | Road-trips/Traveling

#### **References**
