PROFESSIONAL SUMMARY

Software developer with 5+ years of professional experience building scalable e-commerce solutions and enterprise integrations. Proven track record in full-stack development using C#, .NET, and modern JavaScript frameworks. Expertise in API design, cloud deployment, and delivering high-performance features that drive business value. Strong communicator skilled at translating complex technical requirements into maintainable, production-ready code.

PROFESSIONAL EXPERIENCE

Software Developer

Miller Solutions Development

05/2021 – Present
Dumaguete City,
Philippines

- Architected and deployed production-ready C# APIs and features for multiple high-traffic Optimizely e-commerce platforms, improving customer account management and reducing manual data entry by 40%
- Engineered automated data synchronization system integrating enterprise management software with e-commerce platforms using scheduled jobs and message queues, eliminating manual import processes and improving data accuracy
- Developed custom Optimizely extension for automated product image upload and linking, reducing content update time by 60% and accelerating time-to-market for new product launches
- Managed full application lifecycle on Microsoft Azure (Optimizely DXP), including deployment automation, performance monitoring, scaling, and incident response for mission-critical e-commerce sites
- Collaborated with cross-functional teams to rapidly diagnose and resolve production issues, minimizing downtime and maintaining 99.9% uptime SLA
- Led client requirements gathering sessions and translated business needs into detailed technical specifications, ensuring alignment between stakeholder expectations and development deliverables

Entry-Level Software Developer

Miller Solutions Development

02/2020 – 05/2021
Dumaguete City,
Philippines

- Developed responsive user interfaces for web (Angular) and mobile (Vue.js) applications, ensuring consistent user experience across devices and browsers
- Designed normalized database schema for internal web application using Entity-Relationship modeling, ensuring data integrity and supporting future scalability requirements
- Maintained and enhanced existing features based on user feedback, demonstrating strong debugging skills and attention to code quality

EDUCATION

Bachelor of Science in Information Technology

Negros Oriental State University

Graduated: 2017

2017
Dumaguete City,
Philippines
